EDUCATION

Master of Science in Data Science and Analytics

Georgetown University • GPA: 4.00

May 2024

Bachelor Of Arts in Economics and Philosophy

Georgetown University • GPA: 3.767

May 2023

Graduated with Economic Honors

WORK EXPERIENCE

M Science • New York, NY

Jun 2024 - Present

Equity Research Associate • Full-time

- Leveraged international consumer transaction data, e-receipts, and other alternative data sources to publish bi-quarterly estimates on key KPIs as the lead associate for five restaurant brands (MCD, DPZ, WEN, QSR, PZZA) and AAPL that consistently outperformed the Street.
- Synthesized numerous datasets using PySpark, SQL, Power Query, and Excel to create new analyses to illustrate trends driving company comps performance as companies released new offerings and macro trends shifted.
- Prepared weekly industry-wide trend reports within client-facing Tableau dashboards across over 100 restaurants, major online delivery platforms (UBER, DASH, JET, ROO), and within Apple's App Store and subscription service offerings.
- Created Databricks SQL alerts to create weekly alerts for price, menu, and consumer behavior changes on web-scraped data to monitor thousands of items across dozens of restaurants, aggregators, and Apple products.

Yext • Rosslyn, VA

May 2022 - Aug 2022

Technical Engagement Intern

- Led client communications for over a dozen clients ranging from Goldman Sachs to Bojangles, and managed developer teams to prioritize and solve clients' most pressing needs and ensure all deliverables met client expectations.
- Enhanced client SEO by developing easily navigable location pages using HTML for maximum customer visibility.
- Developed a "Help Site" and documentation using HTML, Jira, and Asana to answer clients' unique queries and centralize critical information to optimize client hours.

PROJECTS

Wine Menu Scanner

Feb 2025 - Present

<https://winemenuscanner.streamlit.app/>

- Constructed a Streamlit app in Python to scan PDF wine menus using Google Gemini, pass the wines to Vivino's wine search, web scrape the page, and return the wine's average rating, food pairings, suggested price, and other web-scraped data.
- Deployed application to process hundreds of wines in minutes to deepen understanding of the offerings and get the best value.

How Redditors Discuss Music (Big Data and Cloud Computing)

Aug 2023 - Dec 2023

<https://gu-dsan6000.github.io/fall-2023-reddit-project-team-05/>

- Analyzed all Reddit posts from 2021 to 2023, totaling over 800 million entries using Spark, AWS Sagemaker, and Azure ML.
- Classified ~8 million posts into music genres using a Multinomial Naive Bayes model using PySpark ML, demonstrating consistency in genre syntax and underlying inter-genre relationships.
- Deployed Named Entity Recognition to identify commonly discussed music topics by genre and across the entirety of the data.

SKILLS

Languages: Python, R, SQL, Stata, HTML, Power Query (M)

Proficiencies: GitHub, Excel, PySpark, Databricks, Power BI, Tableau, AWS, PyTorch, NetworkX, Pandas, Bloomberg Terminal

Interests: Skiing, Weightlifting, Wine, Chess, Denver Nuggets, Denver Broncos, English Premier League
